Your whole environment

will change

In addition to our complete *InnovaSpa* collection, we're pleased to introduce another force of nature: the *Monsoon* spa.

Once again, this spa is all about simplicity: you can enjoy it right away by placing it on any well-leveled ground* and plugging it into a standard 120V outlet.

It can also be converted**, with the help of a certified electrician, to a 240V outlet. That way, the water heater is up to 4 times more powerful, from 1kw to 4kw.

Once you are inside the spa, after adjusting the water temperature to your liking, you'll feel like in a new environment.

Because that's exactly what *Monsoon* means: a change of atmosphere, which, with all its energy, leaves the past behind and prepares for the future.

In this new space full of movement, wind and water are going through the motions of the 24 jets, which become the only masters on board throughout your hydrotherapy session. You can sit back and relax on one of the spa's six seats, including the captain's chair, the ergonomic bed with two reclining positions and the cool seat.

To help you let go completely, we've added headrests to the back of the captain's chair and bed, and enhanced the spa's curves and shapes to fit your body and back. We've also installed many "Sensation" massage zones for your feet, heels, hands, palms and wrists.

You can also take advantage of our new and unique multimedia tray for drinks, phone, and tablet. A specially designed slot will hold everything securely in place, and drip holes will prevent water from remaining on the tray and damaging your devices. Play the music of your choice or your favorite TV series for the ultimate relaxation!

Our pure, elegant design is perfect for your backyard! From the outside, you'll notice its imposing yet discreet presence. LED lights have been added to the exterior corners and inside the spa to add to the relaxing mood. The exclusive waterfall, with its easily adjustable flow rate, is also illuminated.

Finally, the side panels have been designed and optimized to provide easy access during maintenance.

PLUG & PLAY

As soon as the spa is delivered, plug it into a standard 120V outlet and start using it right away!

FEATURES

Multimedia tray

A specially designed slot will hold your phone or tablet and drinks so you can watch your favorite TV show or sports event.
